Thermoform Nursery Container Highlights

Durable construction ideal for transporting and automation

Smooth, matte exterior for a high-end appearance

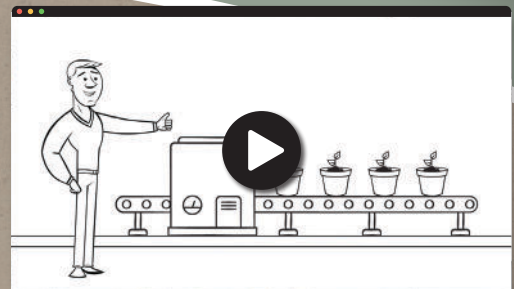

Bottom drainage allows for more efficient irrigation and healthier roots

AUTOMATION FRIENDLY CONTAINERS

If you are not using an automation compatible container with your new state-of-the-art equipment, you run the risk of internal damage which may not be covered under the manufacturer's warranty. HC's branded containers are automation friendly for a variety of equipment.

WHY BRANDED PLANTER PROGRAMS MATTER

Branded Plant and Container Programs matter at garden centers, big box stores, and retail nurseries across North America to help promote a grower's product while dramatically increasing sales.

Branded Plant and Container Programs...

- » Provide peace of mind, especially when paired with consistent results and a positive experience – allowing consumers to conclude the brand is trustworthy.
- » Save time when consumers are making a purchasing decision by reducing the clutter and helping them find what they're looking for in a crowded field.
- » Offer safety by eliminating a consumer's chances of being disappointed in the long run.
- » Afford an opportunity to provide education and information directly on the container – solidifying the brand's stance as an industry expert.
- » Encourage consumers to share their experiences by allowing consumers to become brand advocates based on a consistent, positive brand experience.

Simply put, they are the single most impactful marketing differentiator for your business.
